

# Window Film from MoonRaker™

## POLISHED STERLING™ 15

### Performance Data

Visual Light Transmittance	13.3 %
Visual Light Reflectance	4.9 %
Total Solar Transmittance	11.6 %
Total Solar Reflectance	4.5 %
Total Solar Absorbance	83.9 %
Total Solar Energy Rejected	64.9 %
UV Transmittance	0.6 %

### Physical Properties

Thickness of Polyester Film (mil)	1+0.5
Scratch Resistant Coating	2H
Peel Strength (kg/inch)	0.7

This sheet contains technical data for use as a guideline. Data shown is nominal and for estimating purposes only. Normal variances will occur and are dependent on numerous conditions including substrate, application, processing conditions and the actual glass the product is applied to. Data should not consider the information as absolute. ICT readings may vary depending on testing equipment. The maker does not warrant or guarantee that the actual finished product will provide these users test results.
